Amend Board Policy to Include Designation of Chief Financial Officer

Summary and Staff Recommendation

The Fiscal Affairs and Audit Committee proposes a revision to the Board Policy Manual to require that each of the Chief Executive Officers of the state universities designate a Chief Financial Officer. The Council of Business Officers approved the proposed policy, and the Council of Presidents also approved the proposed CFO policy. The Governance Committee will consider in February, and contingent upon their approval the policy will be on the Board’s February agenda for approval.

Background

The Fiscal Affairs and Audit Committee was charged with reviewing each of the state universities organizational and functional financial reporting structures (FAA 13-02). As part of its review, the Committee asked each state university business officer to make a presentation to the Committee on its respective financial reporting structures including the following:

- Organizational chart of financial functions and positions
- Description of where the financial functions and control points occur
- Description of all affiliated corporations by composition and membership (controlled and non-controlled) and their respective organizational relationship to the University.

Presentations were made at the Committee’s meetings in September (University of Kansas), October (Emporia State University, Fort Hays State University, and Pittsburg State University), November (Kansas State University), and December (Wichita State University). As a result of this review, the Committee charged staff with developing a specific board policy requiring each state university to chief executive officer to designate a chief financial officer with authority to effectively perform the standard duties and responsibilities of a chief financial officer, including having a broad knowledge and understanding of all of the institution’s financial and business matters.

ADOPT RESOLUTION APPROVING THE ISSUANCE BY THE KANSAS DEVELOPMENT FINANCE AUTHORITY OF ENERGY CONSERVATION REVENUE BONDS AND APPROVING THE EXECUTION OF VARIOUS OTHER DOCUMENTS IN CONNECTION THEREWITH – KU

Summary and Staff Recommendation

The University of Kansas requests authorization to proceed with an energy conservation measure with Siemens Industry Inc., Building Technologies Division that will result in the installation of energy conservation measures at the Medical Center with an estimated cost of $2.4 million. The University also requests authorization to issue bonds to finance the energy savings and the costs of bond issuance. The bonds will be issued through the Kansas Development Finance Authority and will be a general credit of the University secured with the energy savings from the projects. Staff recommends approval.

Background

As a part of its ongoing energy conservation efforts, and in light of anticipated electric rate increases, the University of Kansas Medical Center (KUMC) engaged Siemens Industry, Inc., Building Technologies Division (Siemens) to conduct an energy audit of the central chilled water power plant for the purpose of identifying energy conservation projects. The audit is complete and the University is ready to proceed with the energy conservation measures and the issuance of revenue bonds.

Siemens recommended the installation of a specialized control system that will optimize the centralized chilled water plant and chilled water distribution system across the campus. The technology solution is called Demand Flow™ which is a patent pending chilled water optimization method that uses coordinated engineering controls strategies in order to produce energy savings of a high order magnitude as compared to other common control strategies.

The central plant at KUMC produces chilled water that is circulated around the campus to air condition the buildings. The project will include new controls in the central plant and associated pumping systems and installation of variable frequency drives at selected locations in the chilled water pumping systems. These measures will serve to reduce electric energy.

The project will cost approximately $2.4 million and will reduce total energy consumption resulting in an attractive payback of only 4.6 years.

If the Board authorizes KU to proceed with the energy measure outlined above, the University requests that the Board adopt a Resolution approving the issuance of bonds by the Kansas Development Finance Authority to finance the project. The bonds will be a general credit of the University secured with the energy savings from the projects. The term of the bonds will not exceed five years, coinciding with the payback period. The Resolution is set forth in full below:
