Throughout this report, performance data for subgroups with fewer than five examinees is not provided. These cases are noted with a dash (—) to maintain the confidentiality of students' personal information. Due to differences in both the 2020 and 2021 student questionnaires, percent-change data for race/ethnicity is not available in 2020 and 2021. Please see note #7 for details.

## Five-Year Trend

*\*The College Board and the American Council on Education (ACE) recommend granting credit/placement for AP Exam scores of 3, 4, and 5. Students earning a 3 or higher on an AP Exam tend to earn higher GPAs and to graduate within 4-5 years at a higher rate than non-AP students. In this graph, scores of 1 and 2 are shown for general reference as a combined group. For more information, please see Note 3 in the Data Notes section of this report.*

<sup>4</sup>DI codes with counts of 0 and historic DI codes are displayed for reference. These DIs may have had score sends in past years.

The following characteristics represented in this summary are reported by students during exam registration:

- Exam taker origin (In-State, Out-of-State, Non-US)
- Gender
- Ethnicity/race
- Parent education level

Because of rounding, sums of percentages may not equal 100 percent.

1. Who is represented in this report?

This report includes public and private high school students in the US and abroad who indicated 2021 as their graduation year and who sent AP exam scores to your institution(s) between March 1, 2021 and October 31, 2021 (in their graduating year). The report includes all AP Exams taken by this population during high school.

Students may have selected your institution(s) as a score recipient during their exam registration, or they may have requested a transcript to be sent to your institution(s) at a later date.

Why did we include only these students?

Our analysis shows that students who send AP exam scores to an institution between March 1 and October 31 of their high school graduation year have more than a 90% likelihood of matriculating at that institution. Our aim was to align our data as closely as possible with students who are actually enrolled at your institution(s). For this reason, we have not included students who only sent scores to your institution(s) outside this period of time.

2. Total Cohort includes all public and private high school students in the US and abroad who indicated 2021 as their graduation year and who took an AP Exam at any point during high school.

3. AP Exam scores are provided on a five-point scale:

The knowledge and skills criteria for earning a score of 1-5 are derived from standard setting and college comparability studies. As part of this process, committees of college faculty who teach the comparable college course detail the performance required to earn each score. Additional college comparability studies are conducted on campuses to inform the cut scores for the exams. These processes ensure that AP Exam outcomes align with college faculty expectations. For more information about AP Exam score setting, please visit: <https://aphighered.collegeboard.org/exams/scoring>

AP Exam Score	Recommendation	College Course Grade Equivalent
5	Extremely qualified	A+ or A
4	Very qualified	A-, B+ or B
3	Qualified	B-, C+ or C
2	Possibly qualified	
1	No recommendation	

4. The College Board and the American Council on Education (ACE) recommend granting credit/placement for AP Exam scores of 3, 4, and 5. Research also correlates these scores to academic success and opportunity; students earning a 3 or higher on an AP Exam tend to earn higher GPAs and to graduate within 4-5 years at a higher rate than non-AP students. For more information about credit granting recommendations, please visit <https://aphighered.collegeboard.org/setting-credit-placement-policy/credit-granting-recommendations>.

5. The "In-State", "Out-of-State" and "Non-US" designations are based upon where a student tested in relation to your institution.

6. Note the following regarding abbreviations of the race/ethnicity reporting categories:

**Hispanic:** Includes all students who self-identified as Cuban; Mexican; Puerto Rican; or Another Hispanic, Latino, or Latin American on the ethnicity portion of the race/ethnicity questionnaire. In accordance with federal guidelines, students who identify as both "Hispanic/Latino" and one of the above races are reported as "Hispanic/Latino" on this report. Students reported as "Two or more races" are non-Hispanic.

**Traditionally Underrepresented:** Includes all students who provided a response to the race/ethnicity questionnaire and indicated a racial/ethnic group other than White; Asian; or two or more races, White and Asian, or who received a College Board fee reduction for exams taken at any point during high school.

"Other" as an option was discontinued following the 2015-16 race/ethnicity reporting update, and students have now answered the new two-part question. Race/Ethnicity totals from 2019 and prior years may not sum to 100% following removal of the 'Other' option from tables in this report.

**Change from Last Year:** The change from last year for frequency data (number of test-takers or exams) is represented as a percentage change. It is obtained by subtracting the previous year's total from the current year and then dividing this difference by the previous year's total, which is then multiplied by 100.

7. In 2020, AP exam takers saw a new option when providing race / ethnicity data: "I do not wish to respond." As a result of this change, the proportion of students electing not to provide a response nearly doubled. In parallel, the proportions of AP students identifying as Black, as Hispanic or Latino, and as White each declined. In 2021, this question was updated again to remove the "I do not wish to respond" option. Due to these differences in the questionnaires, percent-change statistics are not available for ethnicity between 2020, 2021, and prior years.

8. "Low-income" exam takers received a College Board fee reduction for at least one AP Exam.

9. "Parent Education Level" represents the highest education level reported by students for either parent. Some of the categories listed on the chart are composites of the parent education levels selected by students during exam registration, as follows:

"No High School Diploma" includes "grade school" and "some high school."

"High School Diploma" includes "high school diploma or equivalent," "business or trade school," and "some college."

"Bachelor's Degree" includes "bachelor's or four-year degree" and "some graduate or professional school."

10. AP Exams are categorized as follows:

*Arts:* Art History, Music Theory, Art and Design

*Capstone:* Capstone Research, Capstone Seminar

*English:* English Language and Composition, English Literature and Composition

*History and Social Science:* Comparative Government and Politics, European History, Human Geography, Macroeconomics, Microeconomics, Psychology, US Government and Politics, US History, World History: Modern

*Mathematics and Computer Science:* Calculus AB, Calculus BC, Computer Science A, Statistics, Computer Science Principles

*Sciences:* Biology, Chemistry, Environmental Science, Physics C, Physics 1, Physics 2

*World Languages:* Chinese Language and Culture, French Language and Culture, German Language and Culture, Italian Language and Culture (discontinued, 2009; reinstated, 2012), Japanese Language and Culture, Latin, Spanish Language and Culture, Spanish Literature and Culture

11. Computer Science Principles scores were first released in summer 2017.
12. This system report is an aggregation of the AP score sends to these colleges and universities. Individual institution reports have only been generated for those colleges and universities to which 25 or more students sent scores.
