Structural Analysis and Damage 2

Course Information

Developers: Automotive Collision and Repair State Curriculum Committee

Development Date: 01/29/2014

KBOR Facilitators: Shirley Antes/ April Henry

Credit Hours: 2

Description:

Through a variety of classroom and/or shop/lab learning and assessment activities, students in this course will: apply safety requirements pertaining to structural damage repair; analyze frame inspection and repair procedures; determine direct and indirect damage for structural repair; analyze unibody inspection, measurement, and repair procedures; perform welding techniques for structural repair; and identify cutting procedures for structural repair.

Exit Learning Outcomes

External Standards

by meeting any institution-required NATEF Tasks from the criteria outlined below. NATEF Guidelines of: 95% of HP-I items must be taught in the curriculum; 90% of HP-G items must be taught in the curriculum

1.A Frame Inspection and Repair
4.A Safety Precautions
1.B Unibody Inspection, Measurement, and Repair
1.D Metal Welding and Cutting

Competencies

Apply safety requirements pertaining to structural damage repair

Linked External Standards

4.A Safety Precautions
EDS02: Refinishing Supplement
REF01: Refinishing Equipment And VOC Regulations
REF02: Surface Preparation And Masking
REF03: Color Theory, Application, Tinting, And Blending
WKR01: Hazardous Materials, Personal Safety, And Refinish Safety

You will demonstrate your competence:
- in the classroom or classroom shop setting

Your performance will be successful when:
- 4.A.1 Identify and take necessary precautions with hazardous operations and materials according to federal, state, and local regulations. HP-I
- 4.A.2 Identify safety and personal health hazards according to OSHA guidelines. HP-I
- 4.A.3 Inspect spray environment to ensure compliance with federal, state and local regulations, and for safety and cleanliness hazards. HP-I
- 4.A.4 Select and use the NIOSH approved personal sanding respirator. Inspect condition and ensure fit and operation. Perform proper maintenance in accordance with OSHA Regulation 1910.134 and applicable state and local regulation. HP-I
- 4.A.6 Select and use the proper personal safety equipment for surface preparation, spray gun and related equipment operation, paint mixing, matching and application, paint defects, and detailing (gloves, suits, hoods, eye and ear protection, etc.). HP-I

Analyze frame inspection and repair procedures

Linked External Standards
1.A Frame Inspection and Repair
DAM02: Frontal Impact Analysis
DAM03: Mechanical Systems Analysis
DAM06: Steering And Suspension Damage Analysis
FCR01: Fundamentals Of Collision Repair
FOM01: Automotive Foams
MEA01: Measuring
SPS03: Steel Full-Frame Sectioning
SPS08: Steel Full-Frame Technologies and Repair
SSS01: Structural Straightening Steel
WKR01: Hazardous Materials, Personal Safety, And Refinish Safety

You will demonstrate your competence:
- in the classroom or classroom shop setting

Your performance will be successful when:
- 1.A.1 Diagnose and measure structural damage using tram and self-centering gauges. HP-I
- 1.A.2 Attach vehicle to anchoring devices. HP-I
- 1.A.3 Analyze, straighten and align mash (collapse) damage. HP-G
- 1.A.4 Analyze, straighten and align sag damage. HP-G
- 1.A.5 Analyze, straighten and align sideways damage. HP-G
- 1.A.6 Analyze, straighten and align twist damage. HP-G
o 1.A.7 Analyze, straighten and align diamond frame damage. HP-G
o 1.A.10 Analyze and identify misaligned or damaged steering, suspension, and powertrain components that can cause vibration, steering, and wheel alignment problems. HP-I
o 1.A.12 Identify heat limitations in structural components. HP-I
o 1.A.14 Diagnose and measure structural damage using a universal measuring system (mechanical, electrical, laser). HP-G
o 1.A.15 Diagnose and measure structural damage to vehicles using a dedicated (fixture) measuring system. HP-G
o 1.A.16 Determine the extent of the direct and indirect damage and the direction of impact; document the methods and sequence of repair. HP-I
o 1.A.17 Analyze and identify crush/collapse zones. HP-I

Determine direct and indirect damage for structural repair.

Linked External Standards
1.B Unibody Inspection, Measurement, and Repair
1.A Frame Inspection and Repair
DAM02: Frontal Impact Analysis
DAM03: Mechanical Systems Analysis
DAM06: Steering And Suspension Damage Analysis
DRT01: Drivetrains And Engine Mounts
FCR01: Fundamentals Of Collision Repair
MEA01: Measuring
SPS03: Steel Full-Frame Sectioning
SPS08: Steel Full-Frame Technologies and Repair
STE01: Tires And Wheels
STE02: Suspension Systems
STE03: Rack And Pinion And Parallelogram Steering Systems
SSS01: Structural Straightening Steel

You will demonstrate your competence:

You performance will be successful when:

o 1.B.1 Analyze and identify misaligned or damaged steering, suspension, and powertrain components that can cause vibration, steering, and chassis alignment problems. HP-I
o 1.B.3 Diagnose and measure unibody damage using tram and self-centering gauges. HP-I
o 1.B.4 Determine and inspect the locations of all suspension, steering, and powertrain component attaching points on the vehicle. HP-G
o 1.B.5 Diagnose and measure unibody vehicles using a dedicated (fixture) measuring system. HP-G
o 1.B.6 Diagnose and measure unibody vehicles using a universal measuring system (mechanical, electronic, laser). HP-G
o 1.B.7 Determine the extent of the direct and indirect damage and the direction of impact; plan and document the methods and sequence of repair. HP-I
1. A. 1 Diagnose and measure structural damage using tram and self-centering gauges. HP-I
1. A. 10 Analyze and identify misaligned or damaged steering, suspension, and powertrain components that can cause vibration, steering, and wheel alignment problems. HP-I
1. A. 14 Diagnose and measure structural damage using a universal measuring system (mechanical, electrical, laser). HP-G
1. A. 15 Diagnose and measure structural damage to vehicles using a dedicated (fixture) measuring system. HP-G
1. A. 17 Analyze and identify crush/collapse zones. HP-I
1. A. 16 Determine the extent of the direct and indirect damage and the direction of impact; document the methods and sequence of repair. HP-I

Analyze unibody inspection, measurement, and repair procedures.

Linked External Standards
1. B Unibody Inspection, Measurement, and Repair
DAM03: Mechanical Systems Analysis
DAM05: Aluminum Panels And Structures Damage Analysis
DAM06: Steering And Suspension Damage Analysis
DRT01: Drivetrains And Engine Mounts
FCR01: Fundamentals Of Collision Repair
MEA01: Measuring
SPA01: Structural Aluminum Design And Repair Processes
SPA02: Structural Aluminum Repair Processes
SPS01: Steel Unibody Front And Rear Rails, Floors, And Front Structure
SSA01: Structural Straightening Aluminum
STE01: Tires And Wheels
STE02: Suspension Systems
STE03: Rack And Pinion And Parallelogram Steering Systems
SSS01: Structural Straightening Steel

You will demonstrate your competence:
- in the classroom or classroom shop setting

Your performance will be successful when:
- 1. B. 3 Diagnose and measure unibody damage using tram and self-centering gauges. HP-I
- 1. B. 4 Determine and inspect the locations of all suspension, steering, and powertrain component attaching points on the vehicle. HP-G
- 1. B. 5 Diagnose and measure unibody vehicles using a dedicated (fixture) measuring system. HP-G
- 1. B. 6 Diagnose and measure unibody vehicles using a universal measuring system (mechanical, electronic, laser). HP-G
- 1. B. 7 Determine the extent of the direct and indirect damage and the direction of impact; plan and document the methods and sequence of repair. HP-I
- 1. B. 8 Attach anchoring devices to vehicle; remove or reposition components as necessary. HP-I
Perform welding techniques for structural repair.

Linked External Standards

1.D Metal Welding and Cutting
ADH01: Adhesive Bonding
SPS01: Steel Unibody Front And Rear Rails, Floors, And Front Structure
SPS02: Steel Unibody A-, B-, C-, D-Pillars, And Rocker Panels
SPS03: Steel Full-Frame Sectioning
WCA01: Aluminum GMA (MIG) Welding
WCS01: Steel GMA (MIG) Welding
WCS05: Oxyacetylene/Plasma Arc Cutting
WCS04: Squeeze-Type Resistance Spot Welding

You will demonstrate your competence:

- under instructor supervision
- in the classroom or classroom shop setting

Your performance will be successful when:

- 1.D.2 Weld and cut high-strength steel and other steels. HP-I
- 1.D.3 Weld and cut aluminum. HP-G
- 1.D.4 Determine the correct GMAW (MIG) welder type, electrode, wire type, diameter, and gas to be used in a specific welding situation. HP-I
- 1.D.5 Set up and adjust the GMAW (MIG) welder to "tune" for proper electrode stickout, voltage, polarity, flow rate, and wire-feed speed required for the material being welded. HP-I
- 1.D.6 Store, handle, and install high-pressure gas cylinders. HP-I
- 1.D.7 Determine work clamp (ground) location and attach. HP-I
- 1.D.8 Use the proper angle of the gun to the joint and direction of gun travel for the type of weld being made in the flat, horizontal, vertical, and overhead positions. HP-I
- 1.D.9 Protect adjacent panels, glass, vehicle interior, etc. from welding and cutting operations. HP-I
- 1.D.10 Protect computers and other electronic control modules during welding procedures. HP-I
- 1.D.11 Clean and prepare the metal to be welded, assure good metal fit-up, apply weld-through primer if necessary, and clamp as required. HP-I
- 1.D.12 Determine the joint type (butt weld with backing, lap, etc.) for weld being made. HP-I
- 1.D.13 Determine the type of weld (continuous, butt weld with backing, plug, etc.) for each specific welding operation. HP-I
- 1.D.14 Perform the following welds: continuous, stitch, tack, plug, butt weld with and
without backing, and fillet weld. HP-I

- 1.D.15 Perform visual and destructive tests on each weld type. HP-I
- 1.D.16 Identify the causes of various welding defects; make necessary adjustments. HP-I
- 1.D.17 Identify cause of contact tip burn-back and failure of wire to feed; make necessary adjustments. HP-I
- 1.D.18 Identify cutting process for different materials and locations; perform cutting operation. HP-I
- 1.D.19 Identify different methods of attaching structural components (squeeze type resistance spot welding (STRSW), riveting, structural adhesive, silicon bronze, etc.) HP-G

**Identify cutting procedures for structural repair.**

**Linked External Standards**

1.D Metal Welding and Cutting

WCA01: Aluminum GMA (MIG) Welding
WCS01: Steel GMA (MIG) Welding
WCS05: Oxyacetylene/Plasma Arc Cutting

**You will demonstrate your competence:**

- in the classroom or classroom shop setting

**Your performance will be successful when:**

- 1.D.2 Weld and cut high-strength steel and other steels. HP-I
- 1.D.3 Weld and cut aluminum. HP-G
- 1.D.9 Protect adjacent panels, glass, vehicle interior, etc. from welding and cutting operations. HP-I
- 1.D.10 Protect computers and other electronic control modules during welding procedures. HP-I
- 1.D.11 Clean and prepare the metal to be welded, assure good metal fit-up, apply weld-through primer if necessary, and clamp as required. HP-I
- 1.D.18 Identify cutting process for different materials and locations; perform cutting operation. HP-I
